

## **88. Thanksgiving Letters 1965 Through 2023 (1:21)**

Well, but you know the beauty to me of your letters and then of just your positive attitude is that it reinforces better than any preaching could about the spiritual nature - an aspect to it that is re-energized by memories and the retelling.

Some of the telling may be a little off color and not everybody might appreciate it, but it's part of life - the good, the bad, the bitter, the sweet.

And as long as we can come together and remember - or if we write them down - read some of these things we relive and we relearn. To me the things that we can't....It's been a special relationship
